LiteClik® Infant Car Seats

Every once in a while, a product comes along that changes an industry and invents a new product category.

Diono has done this multiple times, most notably with our Radian®, the original 3-across all-in-one convertible car seat, with an engineered steel core.

More than 200,000 Radians are sold every year, and customers continue to request another product with our safety standards.

Diono is proud to announce the launch of infant car seats, featuring our famous engineered steel core.

FULL STEEL CORE

1 2 3®
fits 3 across

Since 2004, Radian® has been protecting children with our unique reinforced steel core.

In 2024, Diono is taking the steel core loved by parents and introducing it for the first time in an infant car seat.
